Jouy-en-Josas (FR), 06/16 – 07/16

London (UK), 07/15 – 08/15

Work Experience

Deutsche Bank

PhD intern, Quantitative Researcher, Joint between exotic interest rate derivatives trading and algorithmic interest rate strats:

London (UK), 06/22 – 09/22

- Developed machine learning, regularized regression, and stochastic volatility models to forecast the realized volatility of U.S. Treasury futures
- Took part in weekly research seminars to provide updates on the project
- Full time offer received (declined)

Deutsche Bank

Summer intern, Two rotations, Global markets:

London (UK), 06/19 – 08/19

- FX options trading: learnt about trading of hard and emerging market currencies, precious metals, structured volatility and correlation products; priced, risk managed and analyzed portfolios of vanilla and exotic derivatives; worked with the FX quant team to study the spot-vol correlation and test a vega hedging strategy for risk reversals
- Equity derivatives structuring: designed and coded potential systematic trading strategies for the Quantitative Investment Solutions team

Deutsche Bank

Off-Cycle intern, Sales, Credits and interest rates:

Zürich (CH), 06/18 – 12/18

- Responsible for all new bond issues for the Swiss unit of the bank, personally managing around 140 institutional clients on Bloomberg
- Engaged in pricing and hedging of vanilla and structured products
- Completed research projects for the Zurich and London teams to study the competitiveness of the insurance and equity-linked product markets

Computer Skills

- **Core programming languages:** Python (with TensorFlow); Mathematica; C++
- **Past programming languages:** Matlab; R; Q; EViews; Pascal
- **Other software:** Git; GitHub; Excel; LaTeX; Cloud computing

Languages

- **Mother-tongue:** Italian
- **Business proficiency:** English (TOEFL: 112/120)

Achievements and Awards

Imperial College London

- President's PhD Scholarship (awarded for excellent academic performance and promising research potential)
- Business School Graduate Teaching Assistant Scholarship (full funding throughout the PhD program)

London (UK), 09/21

London (UK), 09/20

University of St. Gallen

- Ranked 1st in a cohort of 133 students in the compulsory courses

St. Gallen (CH), 12/19

Extracurricular Activities

PhD Advisor – Imperial College Student Investment Fund

- Advising the quantitative strategy division on interest rate modelling, derivatives pricing, macroeconomics and monetary policy (£100,000 AUM)
